

WEIGHT GUIDELINES **FOR ALL TANDEM TOW DOLLIES**

To determine which Tow Dolly model is right for you, follow these instructions and use the examples below.

STEP #1 – Determine the **FRONT END** weight of your car to be towed. To do this, you must weigh the front end of the car (at truck stops, etc.). As an estimate, you can multiply the curb weight of the car by 62% for a front wheel drive car, and by 52% for a rear wheel drive car. These percentages are approximations and should not take the place of the actual weight.

STEP #2 – Determine the weight of the secondary vehicle. (Motorcycle (s), Golf Cart, ATV, etc.)

STEP #3 – Add these two weights together along with the weight of the desired Tow Dolly itself. You can subtract 200 pounds that the tongue carries. This will give you your GAWR (Gross Axle Weight Rating), which should be less than the GAWR number on the table below.

MODELS →	STANDARD	HD	HDXL
GAWR	3500 lbs	5000 lbs	5000 lbs
GVWR	5000 lbs	8000 lbs	8000 lbs
TOW DOLLY WEIGHTS	835 lbs	950 lbs	1050 lbs
EXAMPLES	Car: 1835 lbs 2 nd Vehicle: + 750 lbs Tow Dolly: + 835 lbs Tongue Wt <u>- 200 lbs</u> Total Weight: 3220 lbs	Car: 2800 lbs 2 nd Vehicle: + 800 lbs Tow Dolly: + 950 lbs Tongue Wt <u>- 200 lbs</u> Total Weight: 4350 lbs	Car: 1935 lbs 2 nd Vehicle: + 800 lbs 3 rd Vehicle + 800 lbs Tow Dolly: + 1050 lbs Tongue Wt <u>- 200 lbs</u> Total Weight: 4385 lbs

GAWR (Gross Axle Weight Rating) = This is the maximum amount of weight the axle is rated to carry.

GVWR (Gross Vehicle Weight Rating) = This is the maximum weight that the Tandem Tow Dolly is rated to carry.

GVW (Gross Vehicle Weight) = This is the weight of the loaded Tandem Tow Dolly as you would load it.

- To obtain the GVW for your particular needs, total up the Tandem Tow Dolly weight, plus the towed car weight, plus the secondary vehicle (s) weight. This total number should not exceed the Tandem Tow Dolly GVWR.

PLEASE NOTE:

The above information is for estimating only. You are responsible for complying with all maximum weight requirements when using the Tandem Tow Dolly system.
