

Unpacking Your New Phoenix Trailer

Inspect the wrapping for damage and holes. Please document this on your bill of lading in the event a claim must be made.

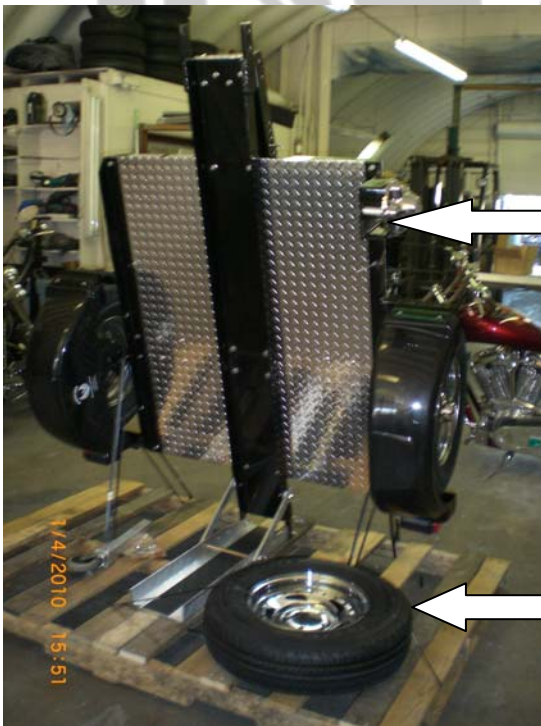

You'll need the following tools:

Knife to cut the wrapping and straps

(2) 9/16" wrenches

(2) 7/16" wrenches

(1) Philips screw driver

Your new Phoenix Trailer will be strapped in several locations. If accessories were purchased, these will also be attached to the pallet.

Optional spare tire mounted to pallet.

Unpacking Your New Phoenix Trailer

After removing the wrapping and cutting the strapping, your new Phoenix Trailer will be able to be removed from the pallet. Standing in front of the trailer between the axels. Slowly pull the trailer towards you, remembering that the trailer tongue needs to rotate up into its final position while the trailer goes from vertical position to the horizontal.

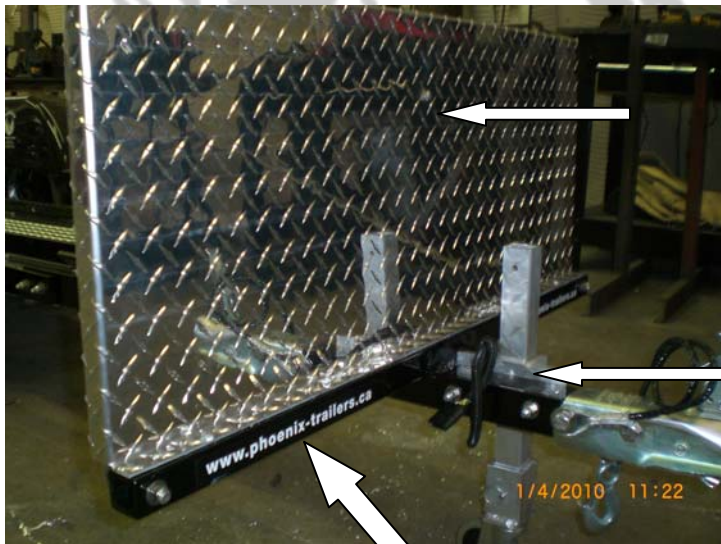

Install the (4) 9/16" bolts washers and nuts here. Nuts to be installed towards the outside.

Unpacking Your New Phoenix Trailer
